DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1,3,5-23,25,27-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Noguchi'394 or Moro'823.

See Noguchi'394, column 5, lines 5-10, lines 50-60, column 7 bottom to column 8 top.

See Moro'823, abstract, summary of the invention, column 7, lines 53-67, column 8, lines 8-20. The applied references do not specifically teach the claimed formulas for silanes etc. However, it is the examiners believe that it would have been obvious to select such compounds since it has been known in the art that selection of known material is within the general skill of a worker in the art.

The amendments and remarks filed by applicants have been fully considered. The claims however, remain unpatentable in view of the new grounds of rejections.
